An innovative **ENERGY COMPANY**

SouthPawGas Limited is a pioneering energy solutions company dedicated to transforming the gas sector of the oil and gas industry.

With a strong focus on gas exploration, gas flaring solutions and sustainability, we are committed to providing domestic and international energy solutions, reducing gas flaring, and leveraging advanced technology for transparency and efficiency in gas operations.

The company aims to move beyond traditional practices, embracing technological advancements, sustainable practices, and strategic partnerships to unlock the full potential of Nigeria's gas resources. **Southpawgas Limited**, is committed to driving efficiency, reducing environmental impact, and creating value for stakeholders while contributing significantly to Nigeria's energy transition.

Vision AND MISSION

At **SouthPawGas**, we emphasize on sustainability and innovation and aim to reduce the nation's dependence on traditional energy sources while promoting cleaner energy alternatives. Our operations in the gas energy sector hopes to contribute significantly to the Nigeria's economy, fostering growth, creating jobs, and driving technological advancements in the energy sector.

OUR MISSION

To be a leading force in the transformation of Nigeria's gas sector, driving innovation, sustainability, and value creation through strategic development, efficient operations, and the adoption of advanced technologies across the gas value chain.

OUR VISION

To establish Nigeria as a regional and global hub for natural gas, recognized for its efficient production, processing, distribution, and utilization, thereby powering economic growth, ensuring energy security, and fostering a cleaner environment for future generations. SouthPawGas Limited envisions being at the forefront of this transformation.

Core VALUES

INNOVATION: Continuously seeking and implementing novel technologies and approaches to optimize gas operations and unlock new opportunities.

SUSTAINABILITY: Prioritizing environmentally responsible practices, minimizing emissions, and promoting the role of gas as a cleaner energy source.

EFFICIENCY: Striving for operational excellence, cost-effectiveness, and the maximization of resource utilization across the gas value chain.

COLLABORATION: Fostering strategic partnerships with government agencies, industry players, local communities, and international stakeholders to achieve shared goals.

SAFETY: Maintaining the highest standards of safety in all operations, ensuring the well-being of employees, communities, and the environment.

INTEGRITY: Conducting business with honesty, transparency, and ethical principles.

Our Core Service OPERATIONS

In the dynamic landscape of energy, **Southpawgas Limited** is strategically positioned to harness the full potential of natural gas and drive sustainable power generation.

Operating seamlessly across the upstream and midstream segments of the gas value chain, and directly linking it to power generation, we are playing a pivotal role in ensuring energy security, fostering economic growth, and facilitating a cleaner energy future.

OPERATING ACROSS THE UPSTREAM AND MIDSTREAM GAS-POWER VALUE CHAIN, SOUTHPAWGAS SPECIALIZES IN:

1. Gas Exploration & Production
2. Gas Development - (LPG) Liquefied Petroleum Gas & (LNG) Liquefied Natural Gas. Plant.
3. Gas Monetization & Flare Reduction
4. Design, Build, Operate and Maintain Gas Metering Stations Partners.

**GAS EXPLORATION
& PRODUCTION**

**LPG & CNG
MANUFACTURING**

**GAS MONETIZATION
& FLARE REDUCTION**

**GAS TO POWER
SOLUTIONS**

Strategic Partnerships & Regulatory Collaborations

SouthPawGas collaborates with industry leaders and regulators to advance Nigeria's gas industry: -

- NUPRC (NIGERIAN UPSTREAM PETROLEUM REGULATORY COMMISSION)
- SO-KAY HOLDING COMPANY
- SENSIA
- SOJAY AUTOMATIONS

Investment & Business OPPORTUNITIES

SouthPawGas is open to investors looking to be part of Nigeria's rapidly expanding gas sector. We welcome partnerships in:

- Gas to power project infrastructure development
- Gas flaring reduction projects
- Gas export & LNG expansion

INVESTOR ENGAGEMENT & BIDDING PLATFORM

Interested investors and partners can submit proposals, bids, or investment interests directly through our website. **Our dedicated investment team** will review opportunities and engage with serious stakeholders.

Our Target MARKETS

As part of our mission to be a leading force in the transformation of Nigeria's gas sector, driving innovation, sustainability, and value creation through strategic development, efficient operations, and the adoption of advanced technologies across the gas value chain, **SouthPawGas** currently serves a diverse clientele, including:

DOMESTIC MARKET (NIGERIA & AFRICA)

CNG & LNG supply to industries, power plants, and transportation.

Gas-to-power projects for industrial and residential energy needs.

Partnerships with private firms for gas flaring reduction & monitoring solutions.

INTERNATIONAL MARKET (GLOBAL EXPANSION)

- European FLNG – Supplying liquefied natural gas to European markets.
- Gas Export to West Africa & Beyond - Providing sustainable energy solutions.
- Strategic partnerships with global oil and gas companies for gas infrastructure development.

A blue-tinted photograph of an industrial facility, likely a refinery or gas processing plant. In the foreground, there are complex networks of pipes and structural steel. In the background, several tall, cylindrical industrial towers or distillation columns are visible against a clear sky. The overall scene is industrial and technical.

Southpawgas Limited

Advanced Gas Flaring Monitoring Technology

SOUTHPAWGAS DEVELOPS ADVANCED GAS FLARING MONITORING TECHNOLOGY

**INNOVATING FOR ACCURACY, TRANSPARENCY,
AND SUSTAINABILITY**

SouthPawGas Limited is proud to announce the development of a cutting-edge gas flaring monitoring system designed to revolutionize the measurement and management of flared gas. This advanced technology is being developed to enhance accuracy, transparency, and compliance in Nigeria's gas sector, supporting the global push for emissions reduction and environmental responsibility.

SOUTHPAWGAS FLARING MONITORING SYSTEM – A TECHNOLOGICAL BREAKTHROUGH

Our new gas flaring monitoring system is being developed in collaboration with SO-KAY holding, SENSIA and SOJAY Automations, three leading innovators in oil and gas metering technology. This state-of-the-art machine will:

- **Provide Real-Time Monitoring** – Capture and analyze flare gas volumes continuously.
- **Ensure High Accuracy** – Utilize advanced sensors and AI-driven analytics to deliver precise measurements.
- **Enhance Data Transparency** – Generate automated reports that can be accessed by regulators, operators, and stakeholders.
- **Support Environmental Sustainability** – Enable gas utilization projects by providing accurate data for flaring reduction initiatives.
- **Facilitate Government Oversight** – Strengthen regulatory compliance by integrating with NUPRC's gas monitoring framework.

THE NEED FOR PRECISION IN GAS FLARING MEASUREMENT

Gas flaring remains a major challenge in the oil and gas sector. Accurate measurement of flared gas volumes is essential for:

- **Regulatory Compliance** – Ensuring adherence to NUPRC and international environmental regulations.
- **Revenue Transparency** – Providing precise data on gas flaring for proper valuation and taxation.
- **Emissions Control** – Enabling operators to track and reduce carbon emissions effectively.
- **Investment Confidence** – Offering verified data to attract international investors in gas monetization projects.

STRATEGIC IMPLEMENTATION AND INDUSTRY IMPACT

SouthPawGas is committed to deploying this technology in partnership with SO-KAY Holding Company for managing gas custody transfer stations across the country. The system will be integrated into these stations, ensuring:

- Seamless data collection for regulatory reporting
- Improved enforcement of gas flaring penalties and incentives
- Optimized flare gas monetization opportunities for gas-to-power projects .

A GAME-CHANGER FOR NIGERIA'S GAS INDUSTRY

With this innovation, **SouthPawGas** aims to:

- Lead Nigeria towards achieving zero routine gas flaring
- Provide energy companies with reliable data for efficient gas utilization
- Position Nigeria as a key player in global gas export and FLNG markets

INVESTMENT & COLLABORATION OPPORTUNITIES

SouthPawGas invites investors, government agencies, and energy companies to partner with us in deploying this revolutionary technology. By investing in our gas flaring monitoring system, stakeholders can:

- Capitalize on Nigeria's growing gas sector
- Support sustainable energy solutions
- Enhance gas-to-power and gas commercialization projects

Interested partners can submit bids and investment proposals directly through our website.

The background of the page is a photograph of industrial gas equipment, featuring large, dark, metallic pipes and valves. The equipment is complex, with various fittings and a red-handled valve visible. The lighting is bright, highlighting the textures of the metal.

Quality Assurance POLICY

At SouthPawGas Limited, we are unwavering in our commitment to delivering safe, reliable, and high-quality gas energy products and services across our entire value chain. We recognize that the integrity of our operations and the quality of our output are paramount to the safety of our people, the protection of the environment, the satisfaction of our stakeholders, and the sustainable growth of our business.

OUR QUALITY ASSURANCE PHILOSOPHY IS BUILT UPON THE FOLLOWING PRINCIPLES:

1. **Customer Focus:** We are dedicated to understanding and meeting the evolving needs and expectations of our customers, providing them with gas energy solutions that are consistently reliable, efficient, and meet all agreed-upon specifications and regulatory requirements.
2. **Safety First:** The safety of our employees, contractors, the communities in which we operate, and the environment is our highest priority. Quality assurance processes are integral to ensuring safe operations, preventing incidents, and mitigating potential risks.
3. **Operational Excellence:** We strive for continuous improvement in all our processes, from exploration and production to processing, transportation, and delivery. We are committed to implementing best practices, utilizing advanced technologies, and optimizing our operations to ensure efficiency and minimize waste.

Our Competitive ADVANTAGE

In the dynamic and evolving gas energy landscape, **SouthPawGas Limited** is strategically building and leveraging several key competitive advantages to establish itself as a leader and a trusted partner. These advantages are not merely operational efficiencies, but deeply ingrained aspects of our strategy and execution, allowing us to deliver superior value to our stakeholders.

INTEGRATED VALUE CHAIN OPTIMIZATION:

Unlike many players focused on a single segment, SouthPawGas operates strategically across key portions of the gas value chain. This integrated approach, potentially spanning upstream production and midstream processing .

- **Enhanced Efficiency and Cost Control:** By managing multiple stages, we can optimize processes, reduce redundancies, and exert greater control over costs, ultimately translating to more competitive pricing and higher returns.
- **Supply Chain Security and Reliability:** Direct involvement in upstream and midstream operations ensures a more secure and reliable supply of natural gas, mitigating potential disruptions and providing greater certainty for our downstream customers.

TECHNOLOGICAL INNOVATION AND AGILITY:

SouthPawGas is committed to embracing and implementing cutting-edge technologies across its operations. This focus on innovation provides a significant competitive edge:

Digitalization and Data-Driven Decision Making:

Leveraging IoT sensors, AI, and big data analytics to gain real-time insights into operations, optimize performance, predict maintenance needs, and make more informed strategic decisions for optimized flow and leak detection.

Environment Policy

Southpawgas Limited, recognizes the importance of protecting the environment and conserving natural resources. Our goal is to minimize our carbon footprint while delivering energy solutions to our customers.

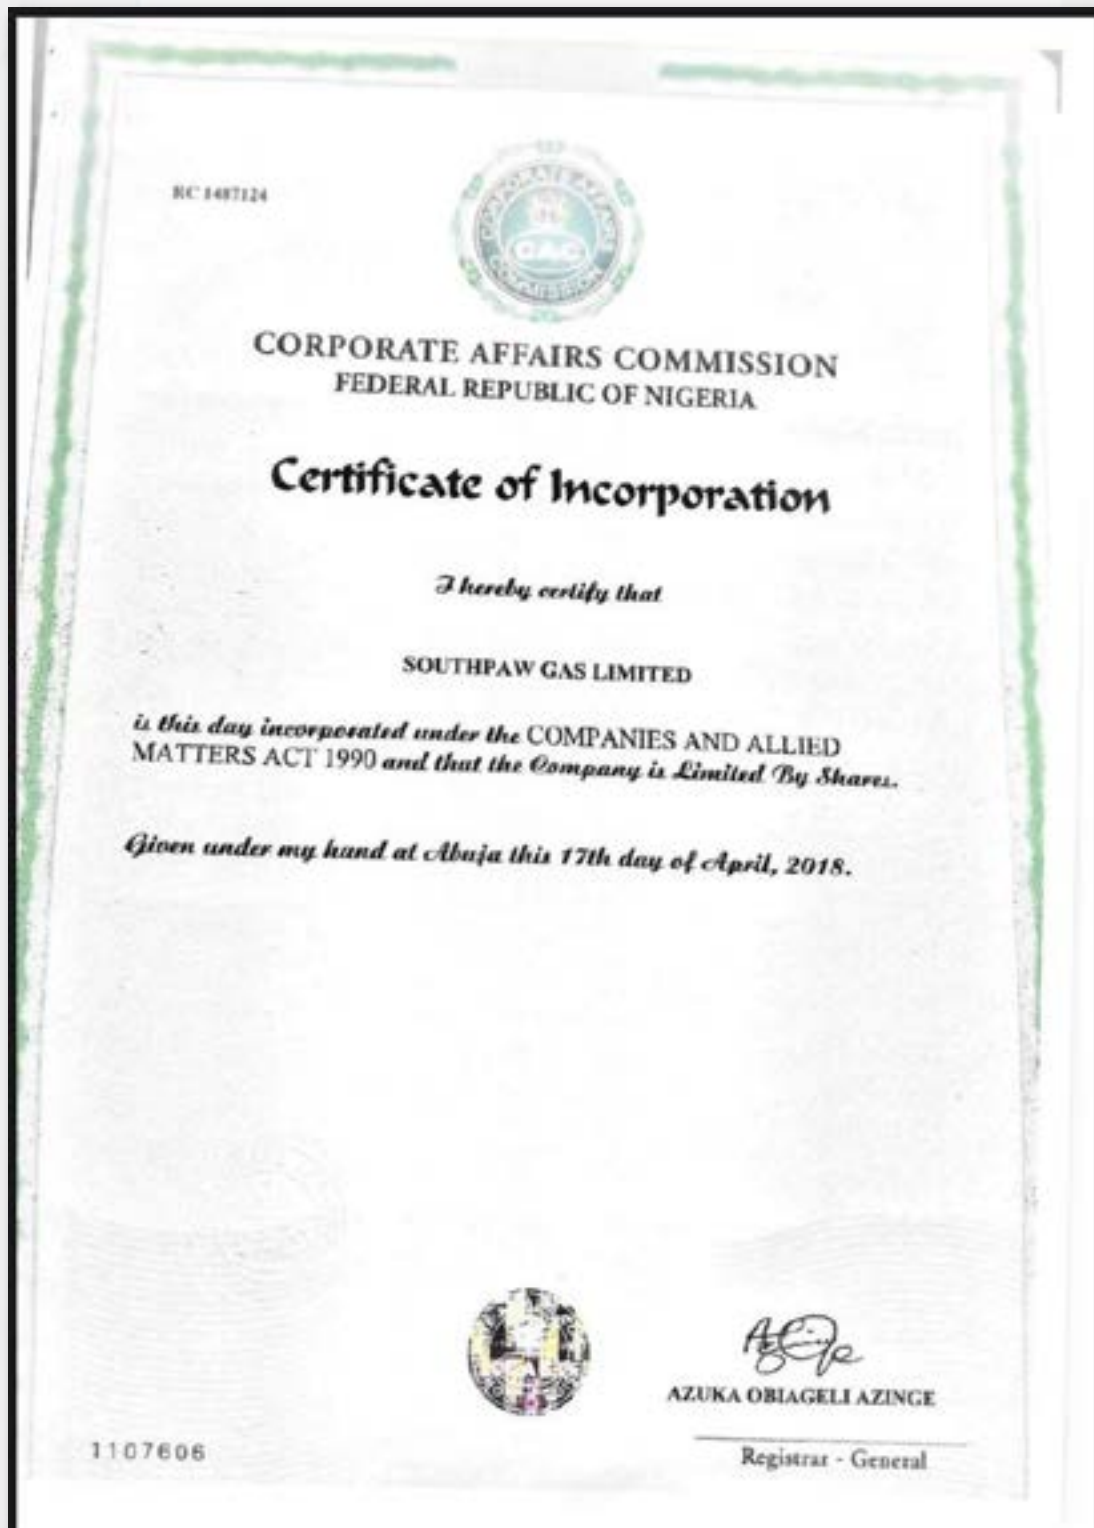

Our Measures to Protect the Environment

includes:

- **Reduce Greenhouse Gas Emissions:** We aim to reduce our greenhouse gas emissions through efficient operations, renewable energy sources, and carbon offsetting.
- **Minimize Waste:** We strive to minimize waste generation through recycling, reusing, and responsible disposal practices.
- **Implement Spill Prevention and Response:** We have a spill prevention and response plan in place to minimize the risk of environmental damage from spills and leaks.

Certification

OUR LICENSE TO DO BUSINESS

Join SouthPawGas in Driving a Transparent and Sustainable Gas Industry

SouthPawGas remains committed to technological advancement, environmental responsibility, and economic growth-in the gas sector. With our innovative gas flaring monitoring system, we are setting a new standard for accuracy, transparency, and sustainability in Nigeria's energy landscape.
